Norwegian Citizen Panel 2017

Overview

Identification	NMP-17-1

Abstract

The Norwegian Citizen Panel is a platform for internet surveys of public opinion in important areas of society and politics in Norway. Participants are randomly recruited from the Norwegian population register, and they are encouraged to participate over time. The panel was fielded for the first time the fall of 2013 and as of 2017 the survey is carried out three times a year. The University of Bergen owns and is responsible for the Citizen panel. The company Ideas 2 Evidence recruits respondents, produces the survey, and provides documentation of the data. Data is stored and shared by the Norwegian Social Science Data services (NSD). The Norwegian Citizen Panel welcomes research proposals for survey content. More information about calls and other updates is available at www.medborger.uib.no <http://www.medborger.uib.no>

Unit of Analysis	Individuals

Scope & Coverage

Countries	Norway

Geographic Coverage

National geographic coverage. Counties as geographic coding.

Universe

Norwegian Citizens above the age of 18.

Other Producer(s)	Asle Høgestøl , ideas2evidence , Coordinator Øivind Skjervheim , ideas2evidence , Coordinator Olav Bjørnbekk , ideas2evidence , Project team member Jostein Ryssevik , ideas2evidence , Quality assurance

Sampling

Sampling Procedure

Members of the Norwegian Citizen Panel have been recruited in three waves, wave 1, wave 3 and wave 8. In wave 1, 4.870 panel members were recruited (see documentation from wave 1). In wave 3, 5.623 members were recruited (see documentation from wave 3). In wave 8, 4245 new members were recruited.

In wave 1 and 3 a gross sample of 25 000 individuals was randomly drawn from the Norwegian National Population Registry. The sampling procedure of wave 8 equals that of wave 1 and 3, but with a gross sample of 22 000 individuals.

This National Population Registry includes everyone born in Norway as well as former and current inhabitants. The Norwegian Tax Administration is responsible for the register, but the administration is partly outsourced to the private IT-company Evry. Evry drew the sample on behalf of the Citizen Panel after the necessary permissions were acquired from the Norwegian Tax Administration.

22 000 individuals over the age of 18 were randomly drawn from the register. The extracted data was a) last name, b) first name, c) address, d) gender, and e) age. The sample excluded people with no current home address in Norway.

Weighting

To compensate for the observed bias, a set of weights has been calculated. The weights equal the relation between a given strata in the population and the total population, divided by the relation between a given strata in the net sample and the total net sample. This procedure returns values around 1, but above 0. Respondents who are underrepresented will receive a weight above 1 and respondents who are overrepresented a weight below 1. The weights of the different stratums are listed in the documentation report (table 8 in the appendix).

When calculating the weights, the information regarding the respondent's geographical location, gender and age are based on registry data. These attributes were included in the sample file we received from the Norwegian Population Register. Information regarding the level of education is provided by the respondents when answering the questionnaire. Approximately 9 percent of the net sample did not answer this question. Because of this, two different weights have been calculated:

- Weight 1 based on demographic variables (age, gender and geography)
- Weight 2 combining the demographic variables with education. Respondents with missing data on the education variable are only weighted on demography (the education component of the weight is set to 1 in these cases).

When applied, both weights will provide a weighted N equal to the number of cases in the dataset.

We will strongly recommend using weight 2 in any statistical analysis, as this weight provides the most accurate compensation for the various sources of bias in the net sample.

Data Collection

Data Collection Mode	The survey is based on a online questionnaire with postal recruitment.

New panel members were recruited in multiple steps.

First, letters were sent to everyone in the sample. The letters contained the following information: a) a description of the project, b) the Citizen Panel's policy on privacy and measures taken to protect the anonymity of the participants, c) the time-frame of the project, d) the participants' rights to opt of the panel at any time in the future, e) contact information for the people responsible for the project, f) a unique log-in id and the web address to the panel's web site and g) the estimated time required to complete the survey (20 minutes).

In order to maximize the response rate, an incentive in the form of a travel gift card is included in the project. The value of the gift card is 25 000 NOK. To enter the lottery respondents were required to join the panel and provide their email addresses. Respondents were asked to register on the panel's web site and log into the survey using the unique ID-code provided in their personal letter. Information on the lottery was included in all correspondence with respondents.

The letter was posted 06th of March 2017.

A reminder post card was sent on the 16th of March 2017 to those respondents who a) had not logged into the survey, or b) had neither completed the survey nor provided their email address. Respondents were encouraged to join the panel, with reference to the invitation letter. The unique log-in ID provided in the original letter was also included in the post card.

Thereafter, respondent that had not responded to the survey received a text message 30th of March 2017. The log-in ID was given in the text message. Respondents without a registered phone number received a second post card reminder. The post cards were sent out on the 28th of March 2017.

Data collection among existing panel members was conducted in parallel with the recruitment of, and data collection among, new members. They received an invitation to survey to their e-mail account on the 07th of March 2017. The first and second reminders were also sent to their e-mail account, on the 10th and 16th of March respectively. |

- 6 -

	Existing panel members with registered phone number also received a reminder as a text message. Panel members without registered phone number received the reminder as an email. These last reminders were sent out on the 21st of March 2017

Variables Description

Dataset contains 590 variable(s)

File : Norwegian Citizen Panel - wave 8

responseid: responseid

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=8612 /-] [Invalid=1 /-]

r8interview_start: Date of when the respondentent first opened the questionnaire.

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=8612 /-]
Interviewer's instructions	[Date and time of when the respondent first opened the questionnaire. Excel-format.]

r8interview_end: Date of when the respondentn completed the questionnaire.

Information	[Type= discrete] [Format=character] [Missing=*]
Interviewer's instructions	[Date and time of when the respondent completed the questionnaire. Excel-format.]

r8u: Thematical sub-group from wave 1-7. New thematical sub-groups are defined in wave 8. These are defined in variable R8v.

Information	[Type= discrete] [Format=numeric] [Range= 1-4] [Missing=*]
Statistics [NW/ W]	[Valid=4435 /-] [Invalid=4178 /-]
Interviewer's instructions	[Thematical sub-group from wave 1-7. New thematical sub-groups are defined in wave 8. These are defined in variable R8v.]

Value	Label	Cases	Percentage
1	U1	1119	25.2%
2	U2	1110	25.0%
3	U3	1077	24.3%
4	U4	1129	25.5%
Sysmiss		4178	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

r8rekruttert: The wave the respondent was recruited.

Information	[Type= discrete] [Format=numeric] [Range= 1-8] [Missing=*]
Statistics [NW/ W]	[Valid=8612 /-] [Invalid=1 /-]
Interviewer's instructions	[The wave the respondent was recruited.]

Value	Label	Cases	Percentage
1	Rekruttert runde 1	2058	23.9%
3	Rekruttert runde 3	2377	27.6%
8	Rekruttert runde 8	4177	48.5%
Sysmiss		1	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

r8frflykt_filter: Background variabel for R8FRflykt. Variable equals 1 if respondent is asked r6friiv1_1.

Information	[Type= discrete] [Format=numeric] [Range= 0-1] [Missing=*]
Statistics [NW/ W]	[Valid=8612 /-] [Invalid=1 /-]
Interviewer's instructions	[Background variabel for R8FRflykt.]
Notes	Definerer respondenter som tidligere er spurt r6friiv1_1. Hvis verdi 1 på denne variabelen skal R8FRflykt stilles i pane

Value	Label	Cases	Percentage
0	Is not asked r6friiv1_1 tidligere	7722	89.7%
1	Is asked r6friiv1_1 tidligere	890	10.3%

File : Norwegian Citizen Panel - wave 8

r8frflykt_filter: Background variabel for R8FRflykt. Variable equals 1 if respondent is asked r6friiv1_1.

10	Other:	211	2.5%
11	Would not vote	274	3.2%

File : Norwegian Citizen Panel - wave 8

r8k204: Would vote for following party at parliamentary election tomorrow

| Value	Label	Cases	Percentage
12	Not entitled to vote	233	2.7%
97	No answer	88	1.0%
Sysmiss		1	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

r8k204_10_other: Would vote for following party at parliamentary election tomorrow, other [anonymized]

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=0 /-]
Literal question	Which party would you vote for if there were a parliamentary election tomorrow?
Interviewer's instructions	[All respondents asked.] [Data withheld for the sake of anonymity]
Notes	Annet: (Hvilket parti ville du ha stemt på dersom det var stortingsvalg i morgen?)

r8k8_1: Self-placement on political scale

Information	[Type= discrete] [Format=numeric] [Range= 1-11] [Missing=*]
Statistics [NW/ W]	[Valid=8612 /-] [Invalid=1 /-]
Pre-question	In politics people often talk about the "left wing" and the "right wing". Below is a scale where 0 represents those who are politically on the far left, and 10 represents those who are politically on the far right.
Literal question	Where would you place yourself on such a scale?
Interviewer's instructions	[All respondents asked.]
Notes	R8K8_1 (I politikken snakker man ofte om 'venstresiden' og 'høyresiden'. Nedenfor er en skala der 0 representerer de som

Value	Label	Cases	Percentage
1	0 Left	128	1.5%
2	1	208	2.4%
3	2	632	7.3%
4	3	1226	14.2%
5	4	1202	14.0%
6	5	1677	19.5%
7	6	1098	12.7%
8	7	1178	13.7%
9	8	747	8.7%
10	9	219	2.5%
11	10 Right	174	2.0%
97	No answer	123	1.4%
Sysmiss		1	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

r8km1: Thoughts when you hear/read the words "global warming" [anonymized]

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=0 /-]
Literal question	What do you think when you hear or read the words "global warming"?
Post-question	Please write the first thing that comes into your mind. We want all types of answers, a couple of sentences would be nice, or just a few words if that is better for you.
Interviewer's instructions	[Asked if v=2 OR v=3 and u=2.]

File : Norwegian Citizen Panel - wave 8

r8km1: Thoughts when you hear/read the words "global warming" [anonymized]

	[Data withheld for the sake of anonymity]

r8k13: How much the political system in Norway allows you to have a say in what the government does

Information	[Type= discrete] [Format=numeric] [Range= 1-5] [Missing=*]
Statistics [NW/ W]	[Valid=8612 /-] [Invalid=1 /-]
Literal question	How much would you say the political system in Norway allows people like you to have a say in what the government does?
Interviewer's instructions	[All respondents asked.]
Notes	I hvilken grad vil du si at det politiske systemet i Norge gir folk som deg innflytelse på det myndighetene gjør?

Value	Label	Cases	Percentage
1	To a very great extent	100	1.2%
2	To a great extent	1156	13.4%
3	To some extent	4118	47.8%
4	To a small extent	2602	30.2%
5	Not at all	406	4.7%
97	No answer	230	2.7%
Sysmiss		1	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.
r8k14: Statement: Sometimes politics is so complicated that I do not understand what it's about

Information	[Type= discrete] [Format=numeric] [Range= 1-7] [Missing=*]
Statistics [NW/ W]	[Valid=8612 /-] [Invalid=1 /-]
Pre-question	To what extent do you agree or disagree with the following statement:
Literal question	Sometimes politics is so complicated that people like me do not understand what it's about.
Interviewer's instructions	[All respondents asked.]

r8pad10_bn_1: Evaluate choice, distribution of NOK 2000: Give NOK 0

Information	[Type= discrete] [Format=numeric] [Range= 1-4] [Missing=*]
Statistics [NW/ W]	[Valid=8612 /-] [Invalid=1 /-]
Pre-question	You should now evaluate the choices a "person A" is faced with in a hypothetical situation. Four participants in the Citizen Panel are randomly selected and will receive NOK 500 if they have evaluated one of the choices by person A similarly to the majority of the participants in this experiment. The hypothetical situation is as follows: "Person A is randomly selected to receive NOK 2,000. Person A can give their money away to another randomly selected person B. Person A can choose between giving nothing (NOK 0) to B, NOK 500, NOK 1,000, NOK 1,500 or everything (NOK 2,000)". The table below shows the various choices person A can make themselves. Please indicate how socially acceptable you think each of the five actions are. By socially acceptable it is meant "to be in accordance with moral or appropriate social behaviour".
Literal question	Give nothing to participant B (NOK 2000 to A, NOK 0 to B)
Interviewer's instructions	[Asked if v=1 and R8PAD10_ran=1.]
Notes	Gi ingenting til deltaker B (2000 kroner til A, 0 kroner til B) (Du skal nå evaluere valgene en «person A» stilles ove

Value	Label	Cases	Percentage
1	Very socially unacceptable	166	1.9%
2	Somewhat socially unacceptable	131	1.5%
3	Somewhat socially acceptable	95	1.1%

r8km10_b: Thoughts concerning lawsuit against Arctic oil drilling: Oil exploration in violation of the Constitution's environmental provisions + excerpts from law, critics argue courts should not decide

Information	[Type= discrete] [Format=numeric] [Range= 1-3] [Missing=*]
Statistics [NW/ W]	[Valid=8612 /-] [Invalid=1 /-]
Pre-question	The lawsuit by environmental NGOs against the government over oil drilling in the Arctic, is an attempt to stop the Norwegian Government's planned oil drilling in the Arctic by taking the matter to court and getting the permit for oil exploration declared void. The environmental NGOs bringing the case are supported among others by leading lawyers who claim that oil exploration in the Arctic is in violation of Environmental provision (§112) of the Norwegian Constitution. This says among other things that "everyone has the right to an environment that ensures health and to a nature where productivity and diversity are preserved. Natural resources must be managed on the basis of comprehensive long-term considerations that will safeguard this right for future generations as well. State authorities must put into effect measures to implement these principles". The critics argue that this is a political issue that the courts should not decide on.
Literal question	What do you think about this:
Interviewer's instructions	[Asked if v=2 and R8KM10_ran=2.]

r8km10_c: Thoughts concerning lawsuit against Arctic oil drilling: Oil exploration in violation of the Constitution's environmental provisions, critics argue courts should not decide because of power sharing

Information	[Type= discrete] [Format=numeric] [Range= 1-3] [Missing=*]
Statistics [NW/ W]	[Valid=8612 /-] [Invalid=1 /-]
Pre-question	The lawsuit by environmental NGOs against the government over oil drilling in the Arctic, is an attempt to stop the Norwegian Government's planned oil drilling in the Arctic by taking the matter to court and getting the permit for oil exploration declared void. The environmental NGOs that are bringing the case are arguing that oil exploration in the Arctic is in violation of the environmental provisions of the Norwegian Constitution. Critics argue that this is a political question that the courts should not decide on, due to the principles of power sharing between the government, parliament and judiciary. Leading law professors believe that if the court supports the plaintiffs that it will be a revolution in Norwegian legal tradition.

Pre-question	The lawsuit by environmental NGOs against the government over oil drilling in the Arctic, is an attempt to stop the Norwegian Government's planned oil drilling in the Arctic by taking the matter to court and getting the permit for oil exploration declared void. The environmental NGOs that are bringing the case are arguing that oil exploration in the Arctic is in violation of the environmental provisions of the Norwegian Constitution. The critics argue that this is a political issue that the courts should not decide on. Similar legal proceedings have been conducted in other countries.
Literal question	What do you think about this:
Interviewer's instructions	[Asked if v=2 and R8KM10_ran=4.]
Notes	'Klimasøksmål Arktis' er et forsøk på å stanse den norske regjeringens planlagte oljeboring i Arktis ved å ta saken

Value	Label	Cases	Percentage

r8pad2: Which source is the most reliable? [Conjoint experiment]

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=8612 /-] [Invalid=1 /-]
Pre-question	We are interested in examining what makes people trust different sources of news. Below, we have created two imaginary sources. Please read the descriptions of both sources carefully and answer the question below. [R8PAD2_dimRanText_0] [R8PAD2_dimRanLabel1_0] [R8PAD2_dimRanLabel0] [R8PAD2_dimRanText_1] [R8PAD2_dimRanLabel1_1] [R8PAD2_dimRanLabel1] [R8PAD2_dimRanText_2] [R8PAD2_dimRanLabel1_2] [R8PAD2_dimRanLabel2] [R8PAD2_dimRanText_3] [R8PAD2_dimRanLabel1_3] [R8PAD2_dimRanLabel3] [R8PAD2_dimRanText_4] [R8PAD2_dimRanLabel1_4] [R8PAD2_dimRanLabel4] [R8PAD2_dimRanText_5] [R8PAD2_dimRanLabel1_5] [R8PAD2_dimRanLabel5] [R8PAD2_dimRanText_6] [R8PAD2_dimRanLabel1_6] [R8PAD2_dimRanLabel6] [R8PAD2_dimRanText_7] [R8PAD2_dimRanLabel1_7] [R8PAD2_dimRanLabel7]
Literal question	Let's say you didn't have more information than the above. If you had a choice, which of these two do you think would be the most reliable source to report the news in a complete, accurate and fair manner?
Interviewer's instructions	[Asked if v=3. Conjoint experiment. Respondent is exposed to a description of two news sources. The description contains 8 randomly chosen characteristics from predefined lists. The characteristics are orderer in a randomly fashion. The charateristics are collected from -8PAD2_dimRan[label/text]] [See appendix for visual example]
Notes	Vi er interessert i å undersøke hva som gjør at folk stoler på ulike kilder til nyheter. Under har vi laget to tenkte

| Value	Label	Cases	Percentage

r8pad6_1a_1: Mandate government needs: Taking in more refugees, should government follow result of referendum despite Parliament disagreement? Explanation [anonymized]

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=0 /-]
Pre-question	We are interested in examining what mandate the government will need in order to make important decisions on behalf of the nation.
	Imagine that there was a new debate on taking in more refugees during the next year and that a consultative referendum was held. The yes side voted that we should take in more refugees (10,000 refugees). The no side voted that we should not take in more than we already have (0 refugees).
	[R8PAD6_treatment]
	In such a case, should the government follow the result of the referendum even though the majority in Parliament disagree?
Literal question	Before you indicate your choice on the next page (Yes or No), can you briefly explain why you made your choice?
Post-question	We are looking for all types of answers. A couple of sentences would be great, or just a few words if it is easier for you.
Interviewer's instructions	[Asked if v=2 or v=3, R8PAD6_ran=1 and R8PAD6_ran2=1.]

r8baerg1: Support/oppose policies that would lead to reduction in exchange rates that would encourage tourists such as Fedorov/Nielsen to visit Norway

Information	[Type= discrete] [Format=numeric] [Range= 1-6] [Missing=*]
Statistics [NW/ W]	[Valid=8612 /-] [Invalid=1 /-]
Pre-question	In 2015, Norway received 3.6 million foreign visitors. Foreign visitors, or tourists, alone brought NOK 20 billion into the Norwegian economy in 2015. Volatility in exchange rates in 2007–2015 may have led to the result that flows of tourists from important tourist countries like [R8Baerg_background1] have decreased by [R8Baerg_background1_2] between 2007-2015. This is likely in part due to changes to the [R8Baerg_background1_3] exchange rate. Consider a scenario in which the exchange rate might change in such a way that would lead to tourists to more frequently visit Norway. As a hypothetical example, consider the case of a tourist [R8Baerg_background1_1].

r8baerg1: Support/oppose policies that would lead to reduction in exchange rates that would encourage tourists such as Fedorov/Nielsen to visit Norway

	[R8Baerg_background1_1], who has the following personal characteristics: Is male, 35 years old, and has University education. Before the exchange rate volatility, the average amount of money he planned on spending while in Norway daily was NOK [R8Baerg_background2].
Literal question	If you were consulted on your opinion, would you support or oppose economic policies that would lead to a reduction in the exchange rate that would encourage more tourists such as [R8Baerg_background1_1] to visit Norway more frequently?
Interviewer's instructions	[Asked if v=3.]
Notes	I 2015 kom det 3,6 millioner utenlandske besøkende til Norge. Utenlandske besøkende, eller turister, tilførte 20 milli

Value	Label	Cases	Percentage

r8pad5a_4: Socially acceptable, reporting dice: Report number 4 (Earns NOK 400)

Information	[Type= discrete] [Format=numeric] [Range= 1-4] [Missing=*]
Statistics [NW/ W]	[Valid=8612 /-] [Invalid=1 /-]
Pre-question	You should now evaluate the choices a "person A" is faced with in a hypothetical situation. Four participants in the Citizen Panel are randomly selected and will receive NOK 500 if they have evaluated one of the choices by person A similarly to the majority of the participants in this experiment. The hypothetical situation is as follows: "Person A throws a dice and gets the number [R8PAD5_ranTerning]. Person A will then report the number the dice shows. The number reported is multiplied by NOK 100 and determines how much person A earns". The table below shows the numbers person A can choose to report. Please indicate how socially acceptable you think each of the six choices for person A are.
Literal question	Report number 4 (Earns NOK 400)
Interviewer's instructions	[Asked if v=3 and R8PAD5_ran=1.] [See appendix for visual example]

r8B1: Which description best applies to what you have been doing the last week?

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=8611 /-] [Invalid=2 /-]
Literal question	Which of the following descriptions best applies to what you have been doing for the last 7 days.
Post-question	Mark one alternative.
Interviewer's instructions	[This variable is a compilation of w01_k20, w03_r3k20, r4k20, r5k20, r6k33, r7k33, r8k33. Newest value is always applied.]

Value	Label	Cases	Percentage
1	Paid work (or temporarily absent)	4918	57.1%
2	Studying (not paid for by an employer)	603	7.0%
3	Unemployed and actively seeking work	183	2.1%
4	Unemployed. Want a job, but not actively seeking work	56	0.7%
5	Permanently ill or disabled	306	3.6%
6	Retired	1760	20.4%
7	Civilian or military service	18	0.2%

r8B1: Which description best applies to what you have been doing the last week?

Value	Label	Cases	Percentage
8	At home, looking after children or others	109	1.3%
9	Other	497	5.8%
97	No answer	10	0.1%
98	Not asked	151	1.8%
Sysmiss		2	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

r8B2_1: Gross annual income [From wave 1. Open text]

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=8611 /-] [Invalid=2 /-]
Pre-question	What is your current income?
Literal question	Gross annual income is:
Interviewer's instructions	[This variable is a copy of w01_k25_1. The variable has not been merged with r8B2_2 due to lack of harmony between variables. w01_k25_1 is the only variable, prior to r8k25 in wave 8, where it is specifically asked about gross annual income. The variables that form the basis of r8B2_2 ask for "current income" without specifying gross / net. Another difference is that w01_k25_1 does not have answer categories but open answers. The variables that form r8B2_2 all have predefined intervals. In most cases, the respondent will have reported income in either r8B2_1, r8B2_2 or R8K25, depending on when they were recruited to the panel.]

r8B2_2: Current income [From wave 3, 4 and 5. Categorical]

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=8611 /-] [Invalid=2 /-]
Literal question	What is your current income?
Interviewer's instructions	[This variable is a compilation of w03_r3k25, r4k25 and r5k25. The variable has not been merged with r8B2_1 or r8k25 due to lack of harmony between variables. In R8B2_1 and r8B2_1, it is specifically asked about gross annual income. The variables that form the basis of r8B2_2 ask for "current income" without specifying gross / net. Another difference is that w01_k25_1 does not have answer categories but open answers. The variables that form r8B2_2 all have predefined intervals.]

Value	Label	Cases	Percentage
1	< 150 000	265	3.1%
2	150 001 - 300 000	380	4.4%
3	300 001 - 400 000	464	5.4%

NORSK MEDBORGERPANEL

Vi er interessert i å undersøke hva som gjør at folk stoler på ulike kilder til nyheter. Under har vi laget to tenkte kilder.

Vennligst les beskrivelsen av begge kildene nøye og ta stilling til spørsmålet under.

	Kilde 1	Kilde 2
Ble etablert	Omtrent fem år siden	Omtrent 50 år siden
Nåværende status	Papiravis og nettavis	Nettavis (uten papiravis)
Antall brudd på presseetikk det siste året	Få brudd	Ingen brudd
Sjefredaktøren/eieren støtter åpent partiet	Rødt	Miljøpartiet De Grønn
Andel underholdningsnyheter	En liten andel underholdningsnyheter	Hovedsakelig underholdningsnyheter
Antall lesere	Mange lesere	Få lesere
Reklamefinansiert	Ja, og bruker reklame som ligner på nyheter	Nei
Kommentarfelt	Har ikke kommentarfelt	Ja, og journalistene deltar i kommentarfeltet

La oss si at du ikke hadde mer informasjon enn det ovenfor. Dersom du måtte ta et valg, hvilken av disse to mener du ville vært den mest pålitelige kilden til å rapportere nyheter på en fullstendig, nøyaktig og rettferdig måte?

Example of R8PAD2

NORSK MEDBORGERPANEL

Vi ønsker å studere folks bruk av sosiale medier. Det spiller ingen rolle om du bruker sosiale medier eller ikke.

Under har vi beskrevet to tenkte personer. Se for deg at det er to personer på din egen alder som du har kontakt med via sosiale medier. Vennligst les beskrivelsen av begge personene nøye og ta stilling til spørsmålet under.

	Person 1	**Person 2**
Vinkling i de ti siste delte nyhetssakene	Du er for det meste enig i vinklingen	Du er for det mest uenig i vinklingen
Parti i de ti siste delte nyhetssakene	Høyre har blitt nevnt mest	Kristelig Folkeparti har blitt nevnt mest
Tema i de ti siste delte nyhetssakene	EU og europeisk politikk	Økonomi og skattepolitikk

La oss si at du var nødt til å anbefale de neste ti nyhetssakene som én av disse to deler, slik at alle andre du har kontakt med via sosiale medier ser at du deler disse sakene. Dersom du ikke hadde mer informasjon enn det ovenfor, hvilken person ville du valgt å anbefale nyheter fra?

Example of R8PAD5

NORSK MEDBORGERPANEL

Du skal nå evaluere valgene en «person A» stilles overfor i en tenkt situasjon. Fire deltakere i Medborgerpanelet trekkes tilfeldig ut og mottar 500 kroner hvis de har evaluert ett av valgene til person A i likt som flertallet av deltakerne i dette eksperimentet.

Den tenkte situasjonen er som følger:

«Person A kaster en terning og får tallet 4. Person A skal så rapportere tallet terningen viser. Tallet som rapporteres multipliseres med 100 kroner og avgjør hvor mye person A tjener. Person A bes om å rapportere uærlig.

Tabellen under viser hvilke tall person A kan velge å rapportere. Vennligst indiker hvor sosialt akseptabelt du mener hvert av de seks valgene til person A er.

	Veldig sosialt uakseptabelt	Noe sosialt uakseptabelt	Noe sosialt akseptabelt	Veldig sosialt akseptabelt
Rapportere tallet 1 (Tjener 100 kroner)	○	○	○	○
Rapportere tallet 2 (Tjener 200 kroner)	○	○	○	○
Rapportere tallet 3 (Tjener 300 kroner)	○	○	○	○
Rapportere tallet 4 (Tjener 400 kroner)	○	○	○	○
Rapportere tallet 5 (Tjener 500 kroner)	○	○	○	○
Rapportere tallet 6 (Tjener 600 kroner)	○	○	○	○
